

For July 2019 NGPCC general business

1. Thank the Secretariat for adding some of my responses to the May 2019 Draft Communique and Meeting Summary.

2. Ask the Secretariat if they could either place the date of the Meeting to which the Responses apply and not just the Meeting Number on all the Responses to Questions as it makes it easier to keep track of those still Responses still to come.

2a. Also can the Secretariat please include the images, and copied documents, that came with the initial questions in any responses. The inclusion will greatly reduce any chance of misunderstanding the Responses by those who asked the questions and the members of the wider community whom I represent. (I can always provide copies of any image or document should the Secretariat require them).

Q3. When can the NGPCCC expect to have the presentations from GISEAR that were supposed to happen in February then moved to May?

4. When can the NGPCCC expect to have a presentation from the relevant NSW Government Department on:

Q4a. The Insurance scheme *Environmental risk & Responsibility and insurance arrangement for the NSW CSG industry* as per the Chief Scientist Recommendation 9?

Q4b. The Community Benefit Fund?

5. At the November 2018 NGPCCC we had a presentation by Department of Industry Water with regard to the placing of additional Groundwater Monitoring Bores (1D, 4B and 14) in and around Santos' NGP area.

Q5a. Can the Secretariat ascertain, from the DoI, the progress of the installation and operation of the groundwater monitoring bores will take place? (have also included question in questions to NSW Government Departments)

Q6. When can P4P expect the answers to questions 37.2a, 38.1, 38.2, 38.3, 38.4, 38.6?

Please excuse any of the above listed questions if they are answered prior to this note being presented at the 9<sup>th</sup> July 2019 NGPCCC.

Mr A J Pickard

Delegate to the NGPCCC for People for the Plains and the wider community
