

# WHY I SUPPORT COAL SEAM GAS FROM THE PILLIGA

I have owned my farm for 24 years – my farm is next door to the Santos gas operation and within a few kilometres of the existing gas wells.

I have a family and I have grandchildren, I care about the environment for their future.

There has been gas exploration in my area for most of the 24 years I have lived there - it is nothing new.

- My groundwater has not been affected
- My surface water has not been affected
- My farming practice has not been affected
- My farming lifestyle has not been affected

I have taken the time to ask questions about the Santos project and I am completely at ease being its neighbour

If anyone could have the right to complain it is me – but I have no complaint

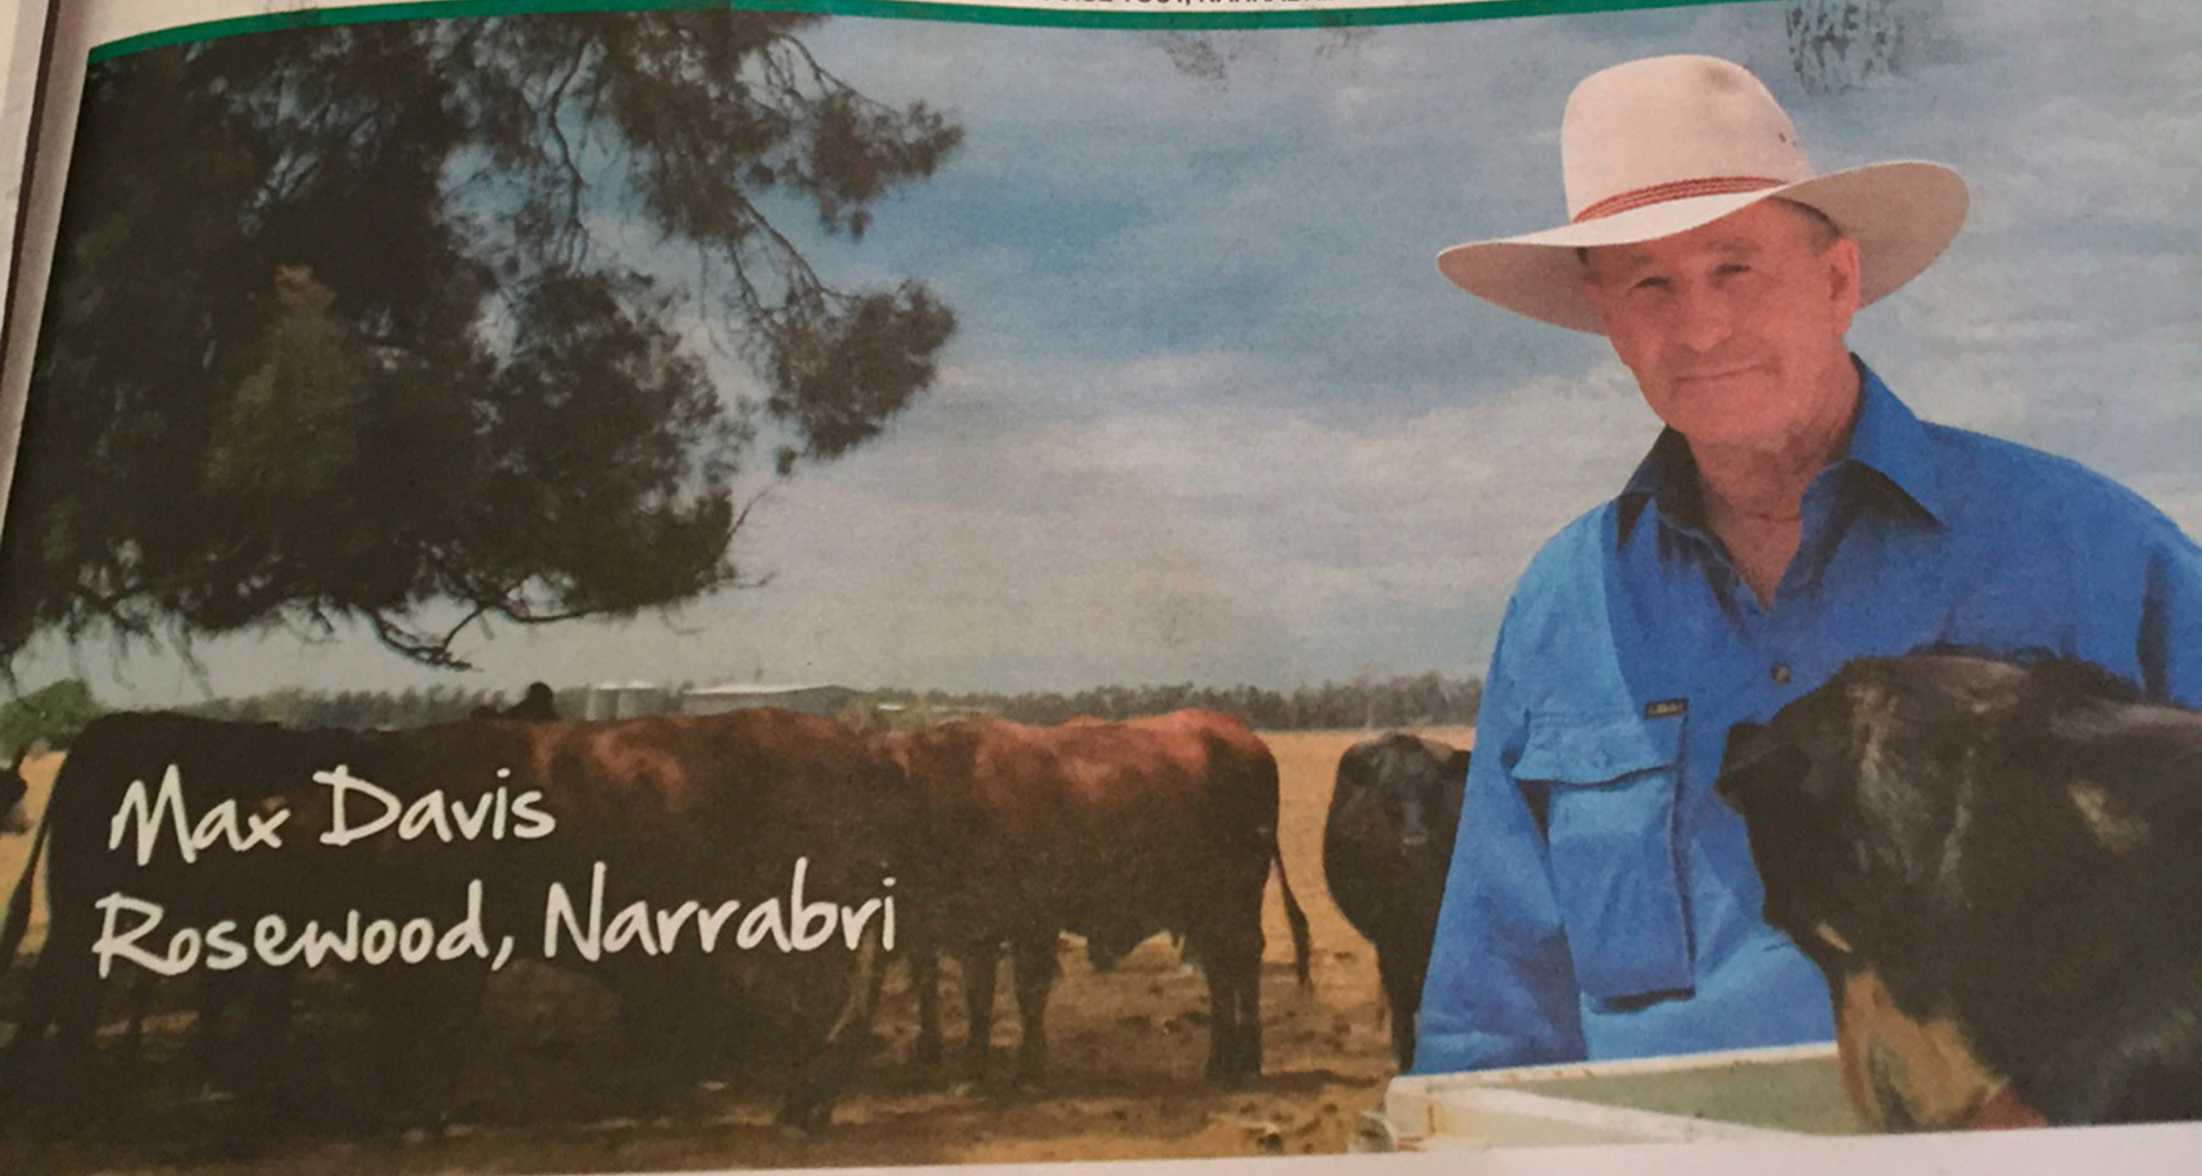

Santos is an excellent neighbour – I find them helpful, honest, and willing to take time to answer my questions

Santos is an Australian Company – I like dealing with an Australian Company

I do not have any Santos infrastructure on my property for which I get paid and as such I do not receive any payment or benefit from Santos

The gas under the Pilliga Forest will eventually be extracted – if we chase Santos away the next company to come along may not be Australian and may not be as professional as Santos
