

# SANTOS WATER PORTAL – ‘HOW TO’ SHEET

## 1. Entering the Water Portal

- Find an area of the map by entering a postal address, sample location name, or lot description in the Search window, or
- Zoom directly to a Santos CSG area by selecting a predefined location, or

## 2. Monitoring Locations

The Santos surface water and groundwater sample locations are shown on the map as orange, aqua and red symbols.

Find more information on a monitoring location by:

- Selecting the 'Pan' tool from the navigation toolbar, then
- Clicking on the monitoring location to open the information panel.

To view the monitoring results for the selected location, click on the 'See Monitoring Results' button to open the Sample Location Report.

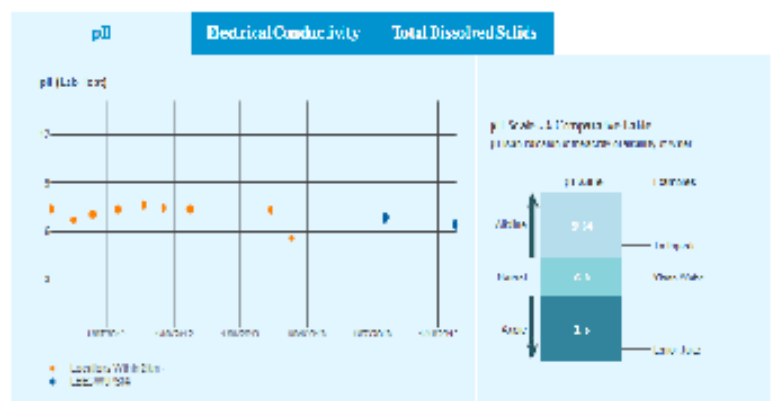

## 3. Monitoring Location Reports

Click on each test parameter tab of the Sample Location Report to view the results for the selected monitoring location.

An explanatory diagram is displayed alongside each test parameter for further information.
