

# Narrabri Gas Project CCC

## Information Request Response

---

<b>Reference:</b>	<b>31.3 Questions tabled by People for the Plains to GISERA in relation to GISERA Workshop on Plug and Abandoning Wells</b>
<b>Request:</b>	<p>In the last half of 2017 GISERA held a workshop on plug and abandoning "P&amp;A" of wells. An interim report was due in December 2017.</p> <ol style="list-style-type: none"><li>1. When will this interim report be available?</li><li>2. The final report is due mid-2018. Will this deadline be met?</li><li>3. If not, do you know why not?</li></ol>
<b>Response:</b>	<p>The GISERA project on Decommissioning of CSG wells (<a href="https://gisera.csiro.au/project/decommissioning-pathways-csg-projects/">https://gisera.csiro.au/project/decommissioning-pathways-csg-projects/</a>) held a workshop in Narrabri on the 13th of September 2017.</p> <p>The project plan did not include an interim report, however we did commit to participants that they would be given the opportunity to comment on our summary of the three workshops held as part of the project. We sent this summary to workshop participants on the 14<sup>th</sup> of February 2018, and have received comments back from many of the participants.</p> <p>We have used these comments to clarify some points in the final report, which is near completion and will be published on the GISERA website within the next couple of months.</p>
<b>Briefing Officer:</b>	Dr Cameron Huddleston-Holmes Senior Research Scientist, CSIRO Energy
<b>Date:</b>	6 March 2018
