

Narrabri Gas Project Community Consultative Committee Meeting 38 – May 2019 Action Item 38.3_PFTP Question to Santos May 2019_Bacteria

At the Narrabri Gas Project CCC meeting on 14 May 2019, Mr Pickard as the representative from PFTP advised that he had questions relating to a report referencing Saltel Industries in Queensland in relation to bacteria. The Chair noted at that meeting that there was no action required from the Narrabri Gas Project CCC secretariat or the committee. The Chair advised the PFTP representative that members could ask for a copy of the report from the member directly if they were interested.

RESPONSE

Santos notes the information provided by Mr Pickard about activities conducted in Queensland by Saltel Industries. Santos is unable to comment on these activities and recommends any questions be put to Saltel Industries directly.

In response to the remaining questions on microbial induced corrosion (MIC), Santos refers to earlier answers provided to Mr Pickard on these matters and available on the Narrabri Gas Project website.
